PROJECTS

Store Stock Manager

The Store Stock Manager (SSM) is very useful for shop workers in daily life for providing instant information of stocks (items available in any store). This includes managing the product in an appropriate way to review any time as per the requirement.

https://github.com/KARKIPRAMOD/StoreStockManager.git

CPP Rogue

RPG (Role Playing Game) named CPP Rouge using C++ language and external library SFML (Simple and Fast Multimedia Language)

https://github.com/KARKIPRAMOD/CPP-rouge-

Health Kit

A project using Microcontroller 8051 in assembly language and c Language.

https://github.com/KARKIPRAMOD/Microcontroller-8051-Pulse-Rate-Monitor

CampusFlow

Streamlining education management. Automates admin tasks, tracks grades, attendance, activities. Empowers schools with efficient data handling.
